CLEAN UP TOOLS

Double click the icon for IE Privacy Keeper {all you do is push clean up now.} Once the small box disappears from above the top of the screen it's done. Push OK.

Double click the icon for SPYBOT. Search for updates download from an American site. Immunize. If no newer updates are available push OK. Push Search & Destroy, and then push check for problems. Fix selected problems, will be highlighted at the top. Push Fix selected problems. They will be fixed automatically. If there are no problems it will say no problems. Close program. {The x in the right corner of the program.}

Double click the icon for AD-AWARE. Check for updates. Push connect then OK if new definitions are available. Wait until it says finish {click finish.} Push start, and then next. Once it is finished push next, check off all boxes in both critical and negligible folders. Push next it will say how many are to be removed, say OK. They will now be removed. Close program.

Double click icon for AVG, search for updates, and get the updates from the Internet. It will download on its own. Scan computer. Once the scan is done it will let you know how many viruses and what AVG did with them. Close program.
